

Advanced Software Development

Introduction

Simon H. Muchinenyika

Introduction

Table of Contents

- Course Introduction
 - Facilitator, Schedule, Prerequisites, Delivery Mode
- Communication Channels
 - MS Teams, E-learning
- Deliverables
 - Quizzes, Individual & Group Projects, Test
- SWECOM
 - Software Engineering Competencies

Introduction

Course Introduction

What are your expectations?

Introduction

Course Structure

- Prerequisites:
 - None
- Delivery Mode:
 - Face-to-face and MS Teams (Blended) - [zuvbi2-J](#)
- Assessments:
 - Quizzes 15%, Test 25%, Group Project 40%, Individual Exercises 20%
- Consultation Hours:
 - Mondays between 16:00 & 18:40

Introduction

SWECOM Elements

Cognitive:
Reasoning,
analytical,
problem solving,
innovation.

Behavioral:
Aptitude,
leadership,
work ethic,
trustworthiness,
communication,
team player.

Software Engineering
Competency Model

Related Disciplines:
Computer Engineering,
Software Engineering,
General Management,
Mathematics,
Project Management
Quality Management,
Systems Management

Introduction

Technical Skills (Fundamental)

- **Software Requirements** elicitation, analysis, specification, verification & validation, process & product management.
- **Software Design** strategies & methods, quality analysis & evaluation, software architectural design.
- **Software Construction** planning, management, detailed design, coding, debugging, testing, integrating & collaborating.
- **Software Testing** infrastructure, techniques, measurement & defect tracking, Test planning.
- **Software Sustainment**: software transition, support, and maintenance.

Introduction

Technical Skills (Advanced)

- Software Security:
 - requirements, design, construction, testing, process, quality.
- Software Measurement:
 - plan & perform measurement process.
- Human-Computer Interaction:
 - requirements, interaction style design, visual design, usability testing & evaluation, accessibility.
