

**NAMIBIA UNIVERSITY  
OF SCIENCE AND TECHNOLOGY**

**Faculty Name:** *Computing and Informatics*

**Name of Department:** *Computer Science*

**COURSE OUTLINE FOR RESEARCH METHODOLOGY(RIT812S)**

---

#### **STATEMENT ABOUT ACADEMIC HONESTY AND INTEGRITY**

All staff and students of the Namibia University of Science and Technology (NUST), upon signing their employment contracts and registration forms, commit themselves to abide by the policies and rules of the institution. The core activity of NUST is learning and in this respect, academic honesty and integrity are very important to ensure that learning is valid, reliable, and credible.

NUST, therefore, does not condone any form of academic dishonesty, including plagiarism and cheating on tests and assessments, amongst other such practices. NUST requires students to always do their own assignments and to produce their own academic work, unless given a group assignment.

Academic Dishonesty includes, but is not limited to:

- Using the ideas, words, works or inventions of someone else as if it is your own work.
- Using the direct words of someone else without quotation marks, even if it is referenced.
- Copying from writings (books, articles, webpages, other students' assignments, etc.), published or unpublished, without referencing.
- Syndication of a piece of work, all or part of an assignment, by a group of students, unless the assignment was a legitimate group assignment.
- The borrowing and use of another person's assignment, with or without their knowledge or permission.
- Infringing copyright, including documents, copied or cut and pasted from the internet.
- Asking someone else to prepare an assignment for you or to write or sit an assessment for you, whether this is against payment or not.
- Re-submitting work done already for another course or programme as new work, so-called self-plagiarism.
- Bringing notes into an examination or test venue, regardless of whether the notes were used to copy or not.
- Receiving any outside assistance in any form or shape during an examination or test.

All forms of academic dishonesty are viewed as misconduct under NUST Student Rules and Regulations. Students who make themselves guilty of academic dishonesty will be brought before a Disciplinary Committee and may be suspended from studying for a certain time or may be expelled. All students who are found guilty of academic dishonesty shall have an appropriate endorsement on their academic record, which will never be erased.

Campus activities that involve physical contact, whether in a meeting, laboratory, assessment, tutorial/lecture will be held under strict COVID-19 National Health and Safety Protocols. Students not adhering to such National Regulations, i.e. wearing masks correctly to cover both the mouth and nose, social distancing of at least 1.5m, hand sanitising and refraining from campus activities when experiencing COVID-19 symptoms, will not be allowed into a venue.

| <b>Course Equivalencies:</b>  | Research Methodology (RIT811S)                                                                                                                                                                                                                                                                                                                                           |
| <b>Course Objectives:</b>     | The course aims to equip students with essential research skills in order to plan and execute a scientific or technical research project, focusing on applied research in Computing and Informatics areas of her/his own interest. Students will get the needed conceptual, writing, and design skills to develop and present a comprehensive research project proposal. |

### Course Delivery Methods:

---

The course will be facilitated through the following learning activities:

- One and a half hours, twice per week, of ONLINE contact with students.
- Introduction of course topics and progress reports assignments via Zoom or Microsoft Teams.
- Online lectures to be delivered through Microsoft Teams
- Lecturers and students to interact through online platforms: Emails, Microsoft Teams and WhatsApp.

**Lectures:** The theoretical foundations will be presented through online platform(Ms Teams). Students are encouraged to embrace online learning and partake in online teaching that will be taking place on **Tuesday**

and Thursday at the time as allocated on the courses timetable. The students are expected to deepen their knowledge and understanding of the covered topics through guided self-study.

**Course format:**

Contact: 45 hours (Online discussions between students and lecturer(s))

Directed self-learning and Self-Directed learning: 65 hours (out-of-class study time, reading prescribed material, organisational overhead, organising and conducting team meetings, online consultations with a lecturer and fellow students, collecting prescribed material, etc)

**Assessment:** 40 hours (All online: Proposal Presentation, Final Thesis Submission)

**Course Resources:**

---

There are several facilities that students can use as a course resource at NUST and at home.

- a) **NUST level:** Prospectus; The Library; student services especially the Writing Centre; Social Worker; Centre for Teaching and Learning; Internet is available the whole day for research.
- b) **Course Level:** Course Outline; Electronic learning resources on E-Learning (Moodle) materials will be developed.

**Quality Assurance:** Moderation of assessments will be done in accordance with NUST's general rules and guidelines on moderation.

**Student Support and Learning Resources:**

---

Institutional support is provided through the NUST Library, the Department of the Students Services, and the Student Representative Council. Faculty support is provided through new-student orientation activities and the FCI student representatives. Departmental and course-based support is provided through supervised practicals, customized course material and through interactions with lecturers, Head of Department, and the Deputy Head of Department.

**Effective Start Date:** Monday, 12 February 2025

**Course Coordinating Team Information:**

|                                  |
|----------------------------------|
| Full Name: Prof Jude Osakwe      |
| Email: josakwe@nust.na           |
| Office phone: 0612072952         |
| Office location: Polyheights 406 |

**Office hours:**

08H00 am – 16H30 pm (consultations via emails)

Consultation hours: All lecturers (involved in the teachings) are available for consultation with students.

Consultation times can be found on the doors of lecturers' offices. You are welcome to make an appointment with the lecturer via email.

**Lecturers Information:**

*(if a specific topic was not clear, please contact the respective lecturer for the topic via email)*

**It is the student responsibility to ensure his/her progress reports are signed by the supervisor and submitted ONTIME.. All submissions (progress reports, presentations, proposal documents) should be submitted online and not through the lecturer emails. LATE SUBMISSIONS WILL NOT BE ACCEPTED. Students are encouraged to be in touch with their supervisors, discuss with their supervisors content, topics and informations shared in class. Communicate to your supervisors your submission due dates on time and not the week the specific activity is due. Please note your supervisors are dealing with other matters in the Department hence its your responsibility to keep them up to date with your progress. ALL SUBMISSION DUE DATES ARE STATED IN THE COURSE OUTLINE**

#### **Student Readiness:**

---

#### **Technology & Equipment Readiness:**

This course will only utilise already existing NUST equipment (on top of the Class Group WhatsApp).

#### **Student Commitments and Contact Times:**

- a) **Class Attendance:** Attend all online-classes, and be on time, and make appropriate notes. If a student fails to attend an online class, it is their responsibility to catch-up on what was covered. Students have access to the recommended books from the library. If any special presentations are used in class, it will be made available (text, audio, video) and do not need to be copied by the student.
- b) **Self-Directed Study:** After every class, and before the start of the next class, sort, complete, and annotate own lecture notes, and select further reading in case any particular item was not understood on the first attempt. Students must spend their notational hours revising, practicing or/and completing homework for the course. Students should take the reading list (prescribed and recommended reading seriously. Read all prescribed material to the extent that the student could write a one-page essay, summarising the content, without looking at the material again.

- c) **Communications:** Maintain active communication with your group lecturer and respective supervisors. Students are expected to use established channels of communication and platform (EMAILS, WHATSAPP) to solve course-related issues on time. The end of the semester is not the best time to fix issues. Use the available time to deal with matters at hand.

**Recommended Reading:**

---

Grønmo, S. (2019). *Social research methods: Qualitative, quantitative and mixed methods approaches*. Sage.

Gravetter, F. J., & Forzano, L. A. B. (2018). *Research methods for the behavioral sciences*. Cengage Learning.

Bell, E., Bryman, A., & Harley, B. (2018). *Business research methods*. Oxford university press.

Hansen, A., & Machin, D. (2018). *Media and communication research methods*. Macmillan International Higher Education.

**Student Learning:**

---

**Specific Learning Outcomes:**

After completing the course students will, through a written research proposal, show evidence of their ability to:

- Evaluate and apply the types, principles and procedures of research in Computing and Informatics disciplines.
- Select appropriate methods for system requirements, data gathering and analysis of sets of data in research;
- Synthesise, interpret and integrate the results and draw conclusions from data;
- Apply the basics of publishing and adhere to recommended referencing styles, e.g. APA guidelines;
- Communicate research process planning effectively.

**Comprehensive Learning Outcome:**

Produce and present a comprehensive research proposal.

**Course Schedule:**

| Semester Week | Specific Date    | Topic                                   | Activity/Deliverables                                                                                                                                                                                                                              |  |

| 10 June 2025 - All RIT Final Proposal Submission                        |                                                           |                                                                                                                                           |                                                                                                                                                                                                                         |  |

**Important Dates:**

**NOTE:** The following dates are subject to change based on the needs of the students at the lecturer's prerogative. Students will be notified ahead of time of any changes.

**Exact Date to be announced**

**Proposal Presentations Exact Date to be announced**

**Final Proposal Submission Assessment and Evaluation:**

Continuous Assessment will apply, consisting of:

- Completion of milestones(Progress reports).
- Research proposal presentation.
- Final research proposal on a topic chosen by the student and approved by the supervisor or a senior academic.

| Assessments                                                            | Weight |
|------------------------------------------------------------------------|--------|
| Proposal Online Presentations (Evaluated by:<br>Supervisor & Assessor) | 40     |
| Final Written Proposal (Evaluated by : Supervisor &<br>Moderators)     | 60     |
| Total:                                                                 | 100%   |

Minimum pass required for this course: 50%

**Course Policies:****General Academic Policies:**

It is the student's responsibility to be familiar with and adhere to the NUST's Policies. These Policies can be found in the NUST Prospectus or online at [www.polytechnic.edu.na/prospectus](http://www.polytechnic.edu.na/prospectus).

**Submission of reports, presentations and final proposal:**

All Late Submissions will not be accepted after the due date and time and thus marked as 0%.

**Failure to Pay Fees:**

A student who fails to pay his/her fees may not be allowed to write the examination and if allowed, the results will be withheld until all outstanding fees are paid in full.

**Important Student Services at NUST**

There are a variety of services that you can use at NUST. These services are to your advantage – Use them!!! They include the following:

- Student Counselling and Career Development - Dean of Students Office.
- Writing centre and student academic problems – Centre for Teaching & Learning (CTL)
- Campus Health and Wellness Centre (CHWC) - Dean of Student's office/ NUST Clinic

**Authorisation:**

This course is authorised for use by:

**ACKNOWLEDGEMENT BY STUDENT**

(To be completed by all students on the course, detached from the course outline and kept on record in the Department)

I, \_\_\_\_\_, student Number \_\_\_\_\_, hereby acknowledge that I have received the course outline for Research Methodology (RIT812S) in semester 1 (2024), and that I have familiarised myself with its content, in particular the statement about academic honesty and integrity. I agree to abide by the Policies and arrangements spelt out in this course outline.
